New Delen 3 (India):

The 13th March, 1950.

S. P. JAIN, for Registrar General, India.

NATIONAL SAVINGS ERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Strati-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 11th February 1950—contd.

11

REMARKS

The figures of births and deaths shown in this statement for the week ending the 11th February, 1950 relate to 189 towns with an estimated population of 24,997 thousands. The total number of towns is 224 and their population is 27,926 thousands. Thus 84% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,268 and 9,125 representing birth and death rates of 29.7 and 19.0 per thousand of population respectively.

В

(A) States—(Parts A and C):—The data here relate to 163 towns with an estimated population of 22,147 thousands. Information about Assam and Bihar could not be included. The total number of towns is 192 and their population is 24,354 thousands. Thus 85% of the total number of towns representing 91% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,938 and 8,335 representing birth and death rates of 30.4 and

19.6 per thousand of population respectively. The table at the end gives the position by states.

The towns of Malogaon in Bombay and Puri in Orissa recorded high death rates of 60.9 and 75.6 per thousand of population respectively. In Malogaon this high death was mainly due to fevers and in Puri this was mainly due to dysentery and diarrhoea.

(B) States—(Part B):—The data here relate to 26 towns with an estimated population of 2,850 thousands. The total number of towns is 32 and their population is 3572 thousands. Thus 81% of the total number of towns representing 80% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,330 and 790 representing birth and death rates of 24·3 and 14·5 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
